
ŽALUZIE NEVA, Ltd.

VISION

Our goal is to produce an active, highly efficient solution for the regulation of exterior lighting and heating with a long lifespan using the newest modern control systems.

We wish to accomplish a future in which the friendly and satisfied faces of our customers, business partners and employees will be met.

MISSION

We are and we will remain a Czech company.

We offer an opportunity for growth to specialized assembling companies on a global scale thanks to mutually beneficial cooperation and the exchange of opinions and experience, which leads to shortening of the installation time on the construction site.

To efficiently fulfil this aim we use modern processing technologies, enabling the possibility of a short delivery time and high level of quality.

We apply processes for the correct setting and precise adjustment of our products before their expedition.

CORPORATE VALUES

An individual approach is typical of our company, as well as teamwork, cooperation, open communication, courtesy, dependability, ability to resolve non-standard situations and keeping one's word.

The management of the company supports the education and training of our loyal employees. At the same time the management welcomes their active input in building and developing the company.

Our company pays attention to creating a pleasant working environment.

We support local non-profit organizations that are oriented towards providing help to disabled children, the elderly and to our weak and infirm fellow citizens.
