Application: ideal solution for shading of corner windows and winter gardens, designed only for external blinds with guiding pins S-90, Z-90, Z-70, C-80 and C-65

Corner holder: components and its accessories:

Order number	Name
01076	Corner holder SET 65-80 mm
01121	Corner holder SET 80-100 mm
01124	Corner holder SET 103-140 mm
01149	Corner holder SET 140-200 mm
01073	Profile 40 x 40 mm in RAL colour
01159	Bottom profile end cap - black
00250	Screw - stainless 5x20 (to fix the holder to the window frame)
00638	Screw 3,9x19 A2 (to fix the holder to profile 40x40)

Technical parameters and material:

Material: the corner holder is made of aluminium, surface painted in RAL colour

Delivery of blind with corner holders:

A corner profile 40 x 40 mm and guiding rails will be delivered in any RAL colour.

Corner holders are painted in any RAL colour and delivered separately from guiding rails.

Note: 1 pc of corner profile is fixed by 2 pcs of corner holders.

Directions how to measure and order external blinds with corner holders:

1. measure the distance of external blind from the window (you must measure the distance between the window and the axis of the guiding rail)
2. measure the distance between dado and the outside edge of the window (measured width of blind see the picture above)

The distance between the window and the external blind MUST BE THE SAME FOR BOTH BLINDS, otherwise it is not possible to use a standard corner holder. In case of a different distance for both blinds it is necessary to produce a new atypical corner holder!

3. all measured dimensions must be mentioned in your order
4. we will calculate the correct size of external blind according to your given dimensions

You will receive an order confirmation including the re-calculated correct size of blind with corner holder !!!
